Another point that I nome is in the matter of punisbment. Ponishment

Thero is so moro important snthject Wr the teacher of religione truthe $t o$ onsider thasn the relation of scienci of man to God. In an artielo mader the atore heading to the P. C. for December 9th, tho writer thereof well naya: "We decta it a sacred privllege ax well as 4 duty, to lown that God's mighty power is dereloped in the low. eft floweret as woll at in the mighticst ephere that wheols through ejpse. Will not every unbiased and generoun, mand aulmit that anythong that sug. gesta lofty thought has a temioncy to oproct rice and fonter virtuc $7^{\prime \prime}$ Tho sriter next detises science to bs hation "what wo know of God," which soem to be good definitions.
And now wo arrive at the important uestion, whevee comes such knowl odge? Surcoly from God. But Ho teacbes mankind tbrongh means, und
what are theso? if (iod's milsty power," and exidently also His lore and visdom, nro "doveloped" in nature, they are there revealed to thoughtfil peoplo, and tbus science-" "whet wo now of naturo"-rovenk Gcd, ns woll na do the Holy Scriptures. Whence
thon is the antagnonism eo oflon appathon is the antagonism eo ofton appa-

But they are among the most learned peole; on the one side the most carelua orcstigationa of nature, and on the of theology. Is then tho subther of theology. It
May an interested bystander, who bas for some gears watchud the labore and difficulties of theso carness men, both in ocience and religion, venture $a$ Thouethe of the stbject? The henc kurcador and bearer of what the one band and of God on the other, must notice that thoy labor as in ou tiroly separate, if not opposite, fields. The scientist exhausts nature sed dieovers suct wondertal relations wbich waterial substances sustain towards auch other, as to be ablo to apply thom in marvelous ways to the natural nses mankind. The theologian, in confrinig harsolf protrably too closely to the lettor of the writs mode of inventigution as inapplicable to spiritural things and makes a like mistake. Thus the two stand alsof

Tho Scriptures are evidently the Dent guide in this matter, sioce they give Goisd method of theching mua-

It is atatd in the Scriptures, Por the childron of the world are in their generation wisor than the children of Higbe." Paul a loo declares: "Hlowbert, , hat was not first which is spiritual. wat that whieb is natural; and afferwards that whirh in spiritual." That
the natural first, cas only huve referone to the world, for God the Creator who is a Spirit, is prior to His erear tion. Jesus atho prayed - Glorify

But boforen en epirit could appear in nature therv had to be some. ibing natural to recetre him, thereforo with mant the naturil has tu bo first: and as the natural is fred with math, bo ture. Nor this along; but the first of every lebson and of all instraction be rocelver ta natural. hoen in the Scrip. read before the spiritual can be per oeived. Hence the importance of learving the wbole lenion whicb na ture tenches, and of rising from it to the spiritual, as "from natore noto naturo's God."
But the natarfal is also first with man in the sense of heing in advanco. This tho Lord taught His diociples by tolling them to learn a lesson from the "fig tree and all the trees," as to what may bo oxpected spiritunlly. Al*o by saying that the childive of this work are winest, Ho teacber that in their
worldly aflirs the peoplo are in advance of their spiritual life. Is not then the physicists' method also the best, who investigates dot aggregatos, bat katmples of which aggregates are composed? In this way be has gaised properties end rolations of theso sim ple substances that the brings about most wonderini and beneficial results;
but only by applying them strictly secording to the unchangenblo laws whict govers them.

The Lord Jeans taught His followers to pray the Father of lave, "Tby king. dom come, ", which is a beavenly and opiritual kingdom. Aro we thus tanght that apiritunt tbinges shall be aa fully known and unod here as the naturn and that the Lord will be nekrowledged as the Giver and Coatroller of tbern nilf? THE following query passed the late unual Meoting without diacussioz:-
Is it aceording to the Goopel, for a brother who indulges in the filtby fasbion of the nse of tobacco, (oxeopt

This seeme to beathetle on the 'titfontat" princfiple, bat the command is. 'First cast the beams out of thine own Fo that theu may see more clearly to druw the mote out of thy brother' ye." However, the trouble will now ing tobseco for. If for modicine, they go acott free and who is it tbat does hot get bick on stoppiag the use of it ? Vow, our butable opision is, that the parenthetical clause bad better been loft out, an there is oot really more than one out of a thousand that need robseco for muedical parposes. The foct that no respectable wames ase to hacco goes to show that it he not noed-

THE USE OF TOBACOO IN HUNTING DON ANB ITS PRUTTB.

The late Methodist Conferched dopted by a vote of two to one bew question to be n-ked of all candidates to the ministry. The question Will yon wholly refrain from tbo 1se of tolacco?" This is a move in the right direction. The nininter shonld be at examplo to the people io whon be ranistery, and what kind of an example is the minister, who ebew and smokes, to young men. Thefraits of sucb examplea are froquently scen
and in car own town of Hantingion, atad is oar own town of lfantingoton tre have, perbapk, an mastretion of it our old once too, are almost given to tobacco and we believe the example o the ministry bes-bad somothing to do with it.
Severml years ago a ministor of tbe cburchabove reforred to eance to-this place fis mastor and fagured ratber promineatly atuong bis people Pre don be bad been an inceterato tobso co weer, int had abandoned it we tos boul declared publicly, that for him to use tobinece woald be a ein. Notwithstuading all this, in a chort time, be re tureed to kis old habit, and troly the last state of that mat was worse thas the first. Ho was not satinfied with the mere nae of tobnceo but abradoned the ministry and went to the manafacture of it. Then too, tbore ari those who are prominent in the cburch, who are instructore of our youth, find
occasionally minister in Holy tbings whouse tolseco, and willeventry to jusLfy their comse as a right one. With wuch a state of affairs it in pot much wonder that boye eight and ton years old may be seen on our struets sunoking and cbewing tobseco Their gool ministere and teachers have set them the example, and it they have any in fluence at nll, it is but natural that they should want to imitate them.
We shoald liko to see a reformation in one toren on the tobacho question and we bope the decision of that late it in the future wo are glad that anong our people there has beon a reformation, and wo bope that it will go on and on antil there will not be a vestige of the vile babit left umong

At our late conference it was decidcd that there should be no amoking on the gronmds. Wo saw the violation of this rate, and we can not now retall singlo instance where wesaw it uoed in any form outside of the grounds, There aro, however, a bumber of our 20 know that a fow of our ministers also noe it, but wo hope tbeir sease of propriety and decency and a desire to ead no exeniphary life, will soon casble tben to gain the vietory orer the long aequirol hahit.

Salvation is the gift of God, not our gif to Ged. Let no man boast of has warkn. It is upon fiod's conditions that se nre saved. Ir I shonid say to this congregation, that every man who raisen his rught hand shall the maved, and if you were to oboy and follow ine, yout would be truating in my works. That would be my work, not the Lord's. Truly, the apostlo says, Woslall lift op holy hads in prayor. But we shonld wat lit up our bande, simply thinking we slult be avod by that act alone. And why doeq that idea como out so clear hore? Becanse you would oxpect the children to be like their Father. It is bechuse those who aro born of the Spivit, those who aro borz of God, shouhd be, ss our text ays, the childiron of Gocl And those who are not his children shonld be come lilso him, and une shonhll hear witness with tho other, proving that thoy are tho childreal of God. The xpirit benring witness with our pirits ahoubl bo concelved if litte more tlean thut. Do we talk in any mattor, and you get God outside of tho great trath of our text. lou may alk on tho sutbect of tho Gospel, its tho great troth of our text, that the Spiric of God beurn witnoss with cur puits, is the givat thought in it It is the gieat iden presented that in the

Talk on the sabject of bagtiont, and to get at tho truth, gou only need to get the didea of our butt, that our Spirite mast got in harmany with the Sprit of (ion) Talh on the subjeat of teet-washing and it ts no mono and no less. The grent truth is that the Xpirit of (iond beavs witaess in regart to that. True

The idea of the toxt is that Gol's Spirit bears witness with our spirits on the whale phan of salvatiou. Thask God it is the wholo truth in bin witness. Conld wo get all the grawdear of thas toxt in onr own lives, and feel that our spirits are brougbt in barmony with the Spirit of God, stul that theso spirita of onrs,bears witness with God's Spiril on evory subject, we then prolushly would moro fully comprebend its meaning.
I will yet prosent anothor point to rou. I have last my comatiaion, ahd noarly all of nay childeren. Under tho providoneo of God, alliction bas beon long and doop in my family it is not the deded of var toxt. If my eppirit can bo brought in barmony with the Spurit of God, the Great Spirit that ruled the YHengige, the Great Spirit that bas croated and mado me, the Great Sparit that must redoom and sare me at last. if I eau got into barmony, in tho Works of that Spivit, in his provideces, in lis wnys and in lise infinite trisdom if I can live there, 1 may stand rejoic ing, becausc biy aparit ueats in harnuo. By with the spirit of God. The idea of orr text, that the "Spirit of God heurs wituces with our spirits," is ilhustrated in tho Chrintion under affie-

Our profession and principies require that we should "love one another with a prse heart forvently." There ure sume persons who are ery firmly set in their own opisions, and if it whs in their power, woull ernsh oversbody that thinks differenty. ## ELDEA T. H. HILLEA, EDHTOR.

Ir you can, give uk nomething in the papier that bas never beon told before, wry, and it will do about so well.

Ir editors could alwaye write something good, and minivters preach some bligg good, and-people talk something good, it would not coss mucb, but still it it.

The Christian duty tao often neg. ected is visiting the sick. To vinit the well may afford some pleosure, but
it in evidence of a better atate of the heart to mingle tho daty and pioasure cogother in visiting the sick It may he a blewing to them, and it may be the good name name of Christ, and reat ionefit to our own feellogs and barnetor. To negleet tho kiok wrong, an injury to the good name of
the charch, to curself, and to the suf oring. Then try to not noglect this important duty.

Somebave sesumed the foet-whehiog In John 13, to bave been at a supper in Botbany. If it was that wonld not chango ite fecte. It was no lesk the
command and example of Josus on tont account. If it was in Botbany that would not change the penalty pronounced on Peter if he refused to bubmit to it. That eould make it no hass an ordinnoce among the disciples only. It could only mato it an ordi-
pance of feet-wayling to the disciples toparato from other ordinances. But there is nothing of evidunce that the suppor was in Betbany forthor thun to make an excues for not observing the ordinatice. It is orudent that Jeaun What in Bethany at a napper, hat it io Bethany to Jeruanalem hefore Ho wash. U His disciples' feet. Aud the only ovidunco there is for His gong back to Bethany comes up in mpposition, for the Scriptures say nothing about it. it is like bourobold baptlam. We may auposo there were infunts in it bat be Senptares any notbing about thore being any. To supposa thero were incould bo, or to suppose that Jease there could bo, or to suppone that Jeaus まent
back to Betbany juat bectuse he could too muob enpposition bo called evidence.

To mprove one mataer of preach. ing and cultivate that power for good, we sbould grow more oxperimonta! ad proctica!, not so macb theory. It is uppreelated only by the feve; it
reaches buta small number, and reasies but theory to themi. Whale the experimental and proctsal is moro powertal to all, it tends to mako then oot only atronger in fantb but botter in beart and life. It mukes proachiog messago to man as he if, turbing him to wee what God woald havo bim takes boid of his own life and foes. ing= acd turus it befole the diving murror, that he sees himeelf as God is doaling with bim. The experimentry aul pravical proacbiog maked man oe that be is the object of the gospel, tho objeet of God's love and provi.
donce, while theory alone is grenerally preaubing above tho audienco, up in the riawo of mind intend of the life. Theory is oflen nut appliod as it Was inundod and it is woreo thun lost, nalu in preaching. Do not fail ralke the application that it say reacb the practical life. Frenching that doce individusll individuall, is too much theory f.r something to rench the ivdividual, that he feols that it is I, und you enn do come good. If your praching is for particular, it is but a chasee if it doea
mach good. If your pronobing is ex- reaken and kindness. Our eburch offiperimental, giving what some bave with Ged'e providence and grace working in it, you bave done good prosth ing. It may not be perfoot, but may do nowe perfect work, because it reach es the beart by sonding God's truth to the individual.

## SELP-DENLAL-THAT IS IT.

Some persons are good illustrations of what it is not, whon they tbink ov ory wheh and detere of thoir mind and feolinga must be gratifed. The gratificetion of solf in everytbing, it every preference and wast, is all their opin tonf end notions, is the opposite of
self-denial, It is sood in a self.will, aelf-praiso, and all manner of felfish ue6s. It is sem when the minieter Fants all the praieo and honor to himself. It is soen when the officer wants aif the suthority and rulo in the church It is even whoe a raember
wants the whole church to sabmit to him in' every mattor of expediency. Bot it is far from ealf denial making Truable to one's solf and all raround bim.
Self-denisl is the noble dieposition of beart that eecks the bappiness of otbers, and fiods contentment when tho pleaburen, and wants, and proferonces are given up for the guod of othere. Solf-denial doea not only consist in the kind of dress wo uso, but in the mind
and apirit withis, manifested in a thouanad ways, neokigg the bappiness and good of othera st the expense of our own efforte or enjjoyment. Self-denisi makes the best companion, the greatent bsppineas, the nuleat poace, bcosuso it exalte others and bumblea uf in all
that will give proferonee to thoso around you. If you want all the bleesings there is in selfdenal make it well as to drese.

## OHUROH GOVERNMENT.

In this it seeme thut the importanee of church power is not manstained as it should be Tho power of the laity not ustecmed bigh enough; not trainod and taught well enough. The bleseing of baving the whole momber abip of a chureb working in harmony kep the ciburch working in barmony it is important that the officere do not tako too anneb power to thomaelves Thoy ehould hoep tho church always foeling that they aro to rulo in all the intoresth of the cburob; that the offi-
cors are only to bring all the buaness before the chureh is a proper manner, explain ft, and let the church oounsel apon it and decide it. If the officore of tho charcb would stop down ahout one half in the autbority they take. and got the eburch to go up in ita power and interest in ruling, wo would church officers aeem to think they rouat do about atl, and ruie tbe charob or was theor burvant. Soune eocm so think they must bave ail their way, and do many things, decide many biogs, and bravely ask the church to agree to what they bave decided.
Another tbing about officera needn reform in many cascs is, that of ten toy members are afraid to say any. oflieer, becanas the eilleer is ready and apt to give sone short rebuke to any of have the,beart to rpeak in favor of sotwe otber conrso. This barab hou with way of reproof is too com kindness is the ovidonee of Cbristion love to all ; rough, wakiad exprebeione are the ovidenco that it is wanting of fieere lose their influence over the
eharch by it; they lose the noble qualitien of their owo disposition by it, and become almost worthleas in keeping peace in the ebureb. It is so nataral where there is a littlo apark of the old Avam to get it into a flume when pposition comes, sad une somo barsh
cers need a mild, hind, calm demeann is their suling or ratber serviog. $A$ man can learn to bo calm and kind un bis own nature. To improre and watch ourselves, in cultivating noble disposi tions, is the great need of all now It good, $A$ dieposition to haste, to Wound, to care not for othera' views or foelings, is alwaye tronble-making, and acters. The first meuninit in cburct government is to govern one's nalf.

The interest of the continental tourist contres this oummer in the Paesion Piay at Oberammorgan. Wo left Munich at $90^{\prime}$ elock Satur day morning, going by rail to Murosu, from which place we took stages for a four bours ride, the road following the mountaine. Tho scencry was bold, grand and picturesque. On oacb side of ue lay bigh mountalus, with mow and then a bold, bald peak towering

I new no man ced nomionl enough to carry bia shoen and walk barefoot, and the most atriking pecuharity of their droys was tho vent which was frequently atriped witl rown of larga bistons. Bet no word can puint the motley throng of pilgrim lograpbes of them you would sappose Weri to be fancy sketches and not pieares of real persons. Along with theso wero burdreds of English and Absersean pedestrians, some istellicintlooking prests, and one or two did friars with "big round bellies" that could drink their ball gallon asig of beer with ease and guets.

## Repart of Oommittee Sent to Elikhart Valley.

The meetiag of Enkhart Valley passed of very pleasantly. The obarges ngaiast brother Tule, by A M. commit ree, were not baytained, but other matCera wure brought ap and eustained and Do wae relicved of his office as mine baemed astistied, and all accepted the decistion of the cammittee. When we explinimed the privilege of eack bishop, enean and Iny momber, and abowed tbe wrong that would astorally grow out of the eourse puratued by aome, all seemed satiafied, and some who had sigsed the ptituons sald they were glad the petitious did not exprose the schismatic sonimenta wheh were said to be the matinents of the Ohio meeting, and that had they known there was any inteation of withdrawing hiey would not bafe nigned them, and now thank God that them, harmoay is restord simong into the net by such men agaia.

Now in all my reporta of our work sen committee, I say the charges of A. M. commitiee Were not sustaiood. Some basea its decisiona. 1 will explain, and bope you will sxe the wisdom of A, ML in sendiag committees $A \hat{i}$ a mectiag it wes proven by witaessea that these brethreb reprefented as baving oltained Mir nuthority from tho elders of the whon brothica, Nov. 11, Isit But Siler donied it in public councal, tho committee brving coaidence in those brettrea and having no direct teatimony gainst them, could ouly decido as they mather we found teatimony to the verta D. Y. Miller and H. Tulosta than they underatoat the uneoting to say bat if A. M. Would aot grast tbeir re quest they woold withdraw, and that the angoarures they coald, ke. Thoy Also nustained theunselves by lottero frour bretbren who wore at the neeting testimuny the commitee felt fealified in
thers. But you ast, how about lireth rea Garver, Flory and Siler? A mambor of letteri were presoated to na from brother Garrer, some writhea before peand in wers circalated and sotae after, and in all hid letters we failed to lind anch in spirit manifeated, some of thom stating that it was not the intention to Lave petitions eirculated, and it was got their intention to wutbdraw if A. M. did aot grent their request. So the comwittee felt to losve that matter for them fix up, sad bope they may do as.
Siace Harshey has been expelled be ane writtoo some very hard thinge to indickuals, part of which was given sa testimany. We asted the privilege of reading the letters eatire before the cargregetion bat were refused We felt if we coold expose the language used, ferm woald be decoired by tho efort pat It takes It takes labguage becoming the Goapel

The foregolvis reanons represent the Atrength of the opposition to Miasionary work in a concise form, and as the
oppesition bas entered the downin of "ruasod," we proposo to let the ligbt of ibrestigation shine for a few mo. 1st Reason. Words are arbitrary signs of idoug, and are in thotryelves peither good nor evil, except at fir as hey are connseted with or designed to represant properor impropor thoughts. Tho word "Missionary" sigmfics one
Whe is sent, bence Christ and the Tho is sent, bence Christ and the

If wo are following tha Old Brothren and mean to exalt them our models, then this "reasob" upplies with incontrovertible forco. But if' we belong to an association haviog
for ita fogadation Cbriat and the Aposa thes, 'and bave for our book of rule and order the Now Teatament scriptures, it savors stroagly of trenson to exnlt uninspired men as our examples. Their uxamples commond tbomsolves only do far as they are oxponents of
Apestolic usages, and it would be worse than ruicide to follow any body eren though bo be an apoathe or an angel further than they follow Christ.
3d Roason. If virtue or boliness on wisdom is the peculiar beritage of the ged, and andiscrotion und luxity of morals or of faith is insepearable from
youth then this "reason" is na the oracles of God.
But that such is not the easo we
have only to consalt the pares of bis. 'y snd of our own observation. The aged do not olfags understard judgment so esye Job. The chureh to-day end youthful Solcmone, snd and to say there are reany ogod Davida and aged Solomons, and thete are Elihue' and

Youth bas its woaknesses inherent to our fallen vature but toe olten, bad to and confirmed by age.
Age is hoosouble whot it ripena cour judgment, eleminates our imperficetions, and neatralizus aur evil propen-

The question of eupplying the neces sities of the needy mimistors is one which is to be solvedeitherby the minastor or his bretbrat. His brothren muat bring his bread and clothing from the soil or, he muet do it and preach too, or lgaverthy mrezohing go utider. Is it more just that fifty mea do it than one? Shall the minister bear. the eross or burden alone and all the rest go free? I apesk thus in bebaif of the order of evangelists and not of the local ministry. There ought to be at least one bundred evangelists in the conetant service of the ministry, and the gospel commands that the chutch supply their wants, Our evangelists do not propose to It is essentially a frce gaspel. gospel, a conacumation for which all Chistians devoutly pray.
5th Reason. The ficet tbat other denomimations are doing a thing dock not raake it wrong, neither does their failure to do a thing make it right. 6th Reason. That will do partially provided it be more comprohensive But until wo can got a eolony to cmi grate to Donmark, und one to Siberia,

I vould demur to that form of setuling the misesonary ques tion. The fact is, however, thoso who advocate that plan don't contemplate the salvation of any others except on great West. Those in other parts mist be lett to the tender mercics of the Devil. Coune brethren for vory shame don't arge the emigration enterne of ovangolixiag the world Was that the Apostolic methot? country did St. Paul settlo in and open a large farm and supply himaself with all tho parapheralia of a well appoiut od farmer?

But 1 aver that a successtal exeen tion of the last great commandment "Go ye into all the world" cannot bo accomplished by a pervly local and socular mibistry. We can go isto a commiswion. A man with one bundred acres of average lund, and a family of Welvo persons two would tike to havo three meals a day, and an oxtra sutit of clothes for Sunday, may make op his misd that he cennot obey that com mand without broaking another, "Provide thing" bonest in the sight of all men") and that is the condition of a large nomber of our ministers. Let the miniaters do their duty more Gaithfully and lat the cburch do its duty more faithfully, let there be a long puil, a stroeg pull, sud a pull all logether, and I thing God our Father will be better pleasod with us and the chureh would be more rapidly ox conded, and we would feel more conIdent of the Father saying to na "well donc good and fnithful scrvants,

True and living faith in Cbrist will mako sinners alive from spiritual death. Will mako them diligent in God's service. Will fill then with Lord whirit which prompts thom to say,

## SUNDAY MEALS-HOW TO SPEND SABBATH AFTERKOOHS,

4The etomach is a great hindrance to the progresa of Goepel trutb, and of aby other truth. Sunday is the great
feast day with many, eves Christians, They neo their rest from other itabor to They neo their rest from other tabor to
deviso estra dishes and to gorga. This is doubly wrong. Proachers munt praneb to a dead weight of rich cakoe, proa, biecuit, porid, proserves, etc. Ono minstor used to say that be beil to preach sunday afternoon to about two
bubhels and a balf of biket boen na Many congrogations a beavior louil und a worso one. Is it any wondor reand, is understood by bo fow?
long as peoplo livo to eat, thoy cannot well listen to hive; and what a aclemn thing to eot under the truth and yot live ${ }^{1+}$
Tho above paragraph we clip from the Christuta. We buve oftou boen
impressed with the thought that there day much feasting on tho Sabbath day On Sunday morning wo have a big breakfast and as 4 reselt, when we drowsy and do not onter into the aro viecs with that zeal and warmith of feding that we should. Then when wo go bome from servioas wo bave a lig ditnor and with our stomache crambed with rich food we do not feel Wer reading or atudy in the afternoon.
We perhaps sleep inscosd of eneding We perhaps slecp inscoad of spending the time ite atuly and meditation. Traly the abeuse of the stomach is a bindrance to gespel truth, and the sooner wo re nove the cause the botter. Io 1 Iway weals be plain and smple, and indeod wo beliove if would be an adrantago house of worsbip with a ele go to tho bouso of worship with a elvaror brain
and our miristers would boenoouruged by uar closer sttention and bigber appreeation of their labere. Wo oughe to propare oursolves for the services.
How roany ministers baye purlialls ailed many minister's bine purtially dilleront hearer, all of whech might be raced back to the indulgence of appespecually, the suntry congrogationa especually, the Sunday dinner is quite
an extoasive aftair. As a general An oxtoosive affair. As a general
thing, thore is about twre as much food pasparel as is necessary, and the women are obliged to spoed a large pirnt of the day in properang it. Thie es pot as it ehould be. The Sablath is iestgaed tor a day of reat from beeular a-ked, how cen it bo bulped? Many of the brethren and bututers comes distance to uttend chureb and Cbris. tinn hospitality deraneds that they abould bu provided will rotrealimont, This mily be fo, but it is not necessary tbat a fuast be provided for thom. Tho great part of all the foou that is really naecessary ouald be provided on Satur-

of cooking bared. In nlert there abonld bo more altention given to the tuber man and not so much to the reading and in cumperamoro on telis loud aubjecte. In many congrogations, and indeed nearly all, thore are Sabbath bethouls. A rory good way to ceson. Thas is edifying. Wo get thoughts and then during tho weel we bate time to mature them, and are
thus botter properad for oar work in the ichool the next Sabbath. Tbinls of this and be sure that the progreas of trath in our own hearte and othora bdul nope bindored hy an execsnivo iddulyonce of the appetite.

Is bo talking of himnelf as a Cbriutian? If so, is he "freed from tho power of sin ?" He says be se "brought into captivity." Wo suggest this is not in conformaty with many declara fone of Scripture and that the rollgion of Jesus doos not froe a man from the ian of an and death, because Paul testifies to captivity. How esa Paul some inward incllpation that leade bitn to cotrmitsio? an fisward proelivity that leade bim into ain contriry to bis desire? Is this the glonious liberty of the Gospel of Christ? It is
promined that grace shall reign, that promined that grace shall reign, that
as sin bas roigned unto death, Es gruce shall reign. Puul showe bow be is a captive; how sin is reigning in his membora, bringing him iato enptivity. This is certainly not roigning, controlling grace; it bs sin atill roigving. The promise ia that grace sball reige, ss ann has reigoed. How true a picture
Paul draws of oin reiguing; leading lim to do evel when bo wated to do good. It grace roigned proportionatoly aftor be mas oaved as it did before, do good, take the place of the teodey to to do evil. Grace reigaing would con tinually lead to do good isstead of oril. It can bardly be said that the apostie is talking about bus owb soul's

The better und more sonsible interprotation is that tho apostlo is describing his condltion when sold under ein.And thin is in conformity with the Where bo eries to bo delivered from the "body of this deatb," careality, inbred an, which is eontanually lead. ing intoain. ## tbibulation.

We all know thet this word, whick occurs not seldom is Scripture and in he Liturgy, means affiction, sorrow, ngmas ; but it in quite worth our quostion the word a little clobar. It ie derived from the Latin tribulem which was the threshing inatrnoent or roller, wherwby the Roman husband men separated the, corn from the

## OUB MINIETRY.

I'rom tho number of electuous that tre being held thronghont nur brotherbood this Fall we sbould think that tho ministerial list will be consider ably enlarged. A few yens more, at the prosent ineroasc, and we will oither have to enlargo ont Almanac or
torint list. Wa suppese it is all right,
hut we havo wopderat whether it would not be better to utilize the foreo we bave than to increave it. There are perbaps not too mony proweliers, bet their luhors tre not properly dis. ributed. In many congrogations foro of three could to spared to fabor in places where there are tone, and whore they could aceomplish more rood. It is certainly not benuficial to nve more than two ministere present a meeting and indeed our observia ceeds bent and bis liabors sin most of cotiro whon alone. Ho then feols that the work in his undias a revult, poes at it with ruote vim atd onergy Then too, there is anotbor consideraon that onr brethron sbonid not ovorlook. When thoro ate ks mathy
proachers in ono congregation, it of en happeny that thoy do not get to preach for two or thres woeks. Thig Obeslly a disadvantaga to on ministor. as well atas evergthins else practice has somolhing to do with efficleacy We appeal to the obscrestion of our aicty for the vuracity of this state ment. Have you net observed that When one of our home mininters soce weoks when he returns be prencbe with inore ease wal more onorgy? Why? Because be has had more ongaged io preaching, ban entered miro 10 to tho Epirit of tho work Many of our ministers feel this. W have heard some nay that thoy wonid t puve them noro exorcize and en. ahlell tham to get more fully imbuod with the spurit of their labors,
Muny howcrer, throngh modesty or brough fosr of being thought ove nexions to preach do not press tha point publicly, but wo do think on laicty should rece and feel it. Thore anot tuech danger of our rambeten becoming too allxious to preach. It i the spint of a trno worker. When wo employ men to work for ue, we don's want buch or will slight our work or that will work only when they can't help v. So whea the Lord walls huen to tho mitistry be wants surch nas aru wallivg and stribus to work. Dos't bo suapicions of the moister that is
invious to he at work every Sabhath. We, for our part, admive that feeling. We need men who are anxions to apend and bo spent in tho Mastor' ,
Now from theqo considerations we give it as ans humble opition cire a hitle more disc retion in calling pten to the ministry. It is the eren: thropgh whut the Lowd worts if is does not go agaikirt his will and par pose, wnd it is certainly not in lismba oy with divino wimlom to put so inny are, fist a dumber huve to pet idly by oud look on thay be an advantage for two min shtels to operato torethec: Clersish ent ins deseqlea ont wo by 1 wru, the

at on ther matter: Wo lave no ohe jections to two, threc, four, no as tany as cin lawe wark every Suthliath, but we do think that a chareh onght toot to eall more thea it can gire regular work, muless it means to sond them to oneslitios outside of it= houndarios. And from wuch Scriptures bi 1 bavo qaotod, we muy foria a pretty correct view of the oneness to which Christiens am to ettain.
We are to be onein all the doctrines of the goopel, and in all the corminand. mente of our Lord, and in all that designed to protnoto our Cbristian od ification. Why do we not say weare to be one in all that is cssential to sal-

anything beyond $\approx$ bat is cssentiul to ealration, they do not think is of much importace. Now we look at the math ter in a difforent light. Whatever our

We are to bo sarietified by its truth We are to be sot apart from the ainfull world by the truth of God. The word of God is to separate us. It's to be a pertwean wall that it to be bailt up and cvory Chriatian rite and practice ia an ndditional layer of atone, an it were, tbat enierges that partition, nad And what is the breadth of that wall It is us hrood as the law of God. In the apostalic ehurch that was comprized of Jewe and Gentiles, Paul aid, "Thero is one faith, one Lord, ove boptiam." When the Jews were very
tenacious ibbout eating flesh, the Gentenacious about eeting flesh, the Ges-
tilea could not seo the necessity in being eo, and what did Paul tench them? Ho taught forbearance with ons another. Ho may, "Lhet not him thet onteth despise bim that eatsth not ; and let not bim which eateth notjudge him that eateth; for God bath receised bim." Rom $14 ; 3$. One aite dows to is table with no meat oa it and he hanks God for hie horbsf anothor site down to his table with ment on it and natter wo bave notbing is the now difpensation, therefore thinge of that rind are to be left to our diserction and o our circumatabeen. These are mattora we have ald, the must bo left to ono's judgreent, and diweretion. But when you eome to Cliristian doctriaes sed the thinge thet Got bas ordained in hie law, don't quote that passage, "let every man be porenuded in his owa mind," for wo hould bo perauded io oar own minds only to aceept tho troth is it fallowss. drop this Ono of tho objects, at drop this Ons of tho objects, at teined for. Why all of the samemind? Paul don't give the reanon here. In reacting in thia way one text pre uppoacs ntother text. Why should shonld we all try to be united? Why hould all decominational divisione be put away? And why ahould weall ne organiantion-one fold of Chriet? The Savior answere it in that prayor o which we bave referred You witl find the anower in the 17th chapter of John. The Savior nayn, "That they all may be one; as thon, Father, art in mes, and I in thec, that they also mny be one is us; that the world msy believe that thou hast sent me." That oneness promotes our officiency, and it promoter ourpower; an you have heard it said, "in union there is trungth." If all tho believors in Christ had thin onenens of mind, and then would labor togather, what good could be donel But you know, unfor tubately the Chrlatan world is divid. cd. Ons denommatlos preaches one or up and another preachos that thig down, and this way onr power is srided. and it is not aimply divided, army. Take two armies ho it the army. Take two armies meeting in batule array, and aboat to entur into deadly confliel. The guos aro sll planted on the ramparts. Thoy all
have their direction. But nappoea there ard twenty or thirty gute di.
rectsd againat the party for whon the wero designed to proteot, thea when the match is to be applied and the word given, to onter the conflict only one half of the power ia oxerted os the enemy. They are tarned right aronnd ngaiant the army of which they tormed a pert. How then? Then you pee what a condition of thing there would be. That seems to be a pretty hard lllustration, but it is a description of the Christian world. Our guas are direoted againet ouralives. I mesa by that, that wo in the churober, instead of treeting the common onemy, are having diffleulties between ourcolves. One thing hore and anotber thing there. The different churches aro engaged in that. Now that is churoh sed the nubjeet of open eomtoution. Ono clans is in fuver of close communion and snother is lavor of open communiua. So thero la a defficulty here. I might piention othor churchee. And wo come down to our owh churchen and wo are sorry there is wot the onien among us that there whould be. We are urning our artill-e ery tgainst oursolves. We are divided mong ourselven, and we sre spending our strength in contending with one another whon that ftrength should bo apent in defending our prineiples aad generol order. Now the iraporianco of thin uciow These churches ought not only to be vilted, but thny ought preperly he axited together. I belleva We will baye to reader a torrible aocount for the condition existing between tho difforoat deaominations, Christ prayed for the oaenese of hia people. There is a wrong bomewhere. Wo ought to bo united together, instead of being so estranged as we are, and be an unbroken power nyainst the world. Oh, what good would be doned Go back to the apontolic chureh, There wee no general division in that church then. There wss eome form difficulties, it is true, hut no general ruptare, and look at the powor of that chureh. Look at the churches apringing up in Rome, the city of idaletry. boatheniem and crimes ; and why wan that? Becauso they brought the unted power of the clareh to bear against the world. And so it would bo to day. But we will give mow time to thie thougbt again, for we feel it is an importast one. "Bo of the same mind." How far? We bavo afloded to that Wo don't think you ent object to the position wo bavo taken this moraing. Dos't ask about salvation. Don't say this thing and that is not essontial to uslvation. ## BUNBAY SOBOOL CONVEFTIOKS

Some of our vory good uesnthg bretbron are not faworable to Sunday School Conventionir bocauss thuy do not undereland thoir object. All con vontions are good of bad according to the work accomplistect. Our Aonual Ioctiog is a large religious convenlon und we necept it to bo good be cause the werk of the convention is to
labor for the good of the chureb and bo promotion of the cnuso of Christ On the same ground wo think it proftable to Lold Sunday School convontions becauco at them we prepoes to labor for the good of tho Sunday School nd to promote a bettar syatem for the roligious traising of onr children. Wo bold Sunday School moetings as wo bave to hold at Annual Meeting. The best way to remedy this is for the Sonday School workers to meet togothor for the purposs of exchanging viowe and agroeing an a aystom that will promote Biblo in, many schools are organixed by charebes that bavo bad no exporionce whatever in condecting them, and Locause of thia thoy frequently eopy from schoo's of other denomi. the Sunday seheel workers of thene he Sunday seheel workers of these three districts. This wo call a Stato Convention, and our object will bo to of Sunday school work that will beat promoto the gouse, and bo io harmeny with the advico of A. M, that they aball to "conductod on Gospel order."
(Sob Minuter of A. 3f., page 204) Sob Minutes of A. Mf, page 204),
This is onlarging oor band of union If the other States are working in tho usme direction we will soon be ready to take atotber etep in the sumo direc tion, and that will bo to hold a gonoral Convention to be ropresented by the statos. This will form the "union bead" of the whole ctareh, and we

It oecurs to me if all f our dear brethren would sllow themelves to act dut the conclusions of their Wh good judgment thoy could not belp but admit that workinge of thin find may be promotivo of good, britb to the Suvday Sehool work avd to tho Church. scomed to feel the necensity of scbook for their youth, that they might bave the belp of batb clucation and piety oproteot them from the eniorn to which they were exposed. We Envo Cbristians of Alesundria, in the early ages of tho churel, wers very timilar so those of our brosliren of tho present ago. The Christians of Aloxandris,

Otber religious denominstions around us were builling up and multiplying educationar lostitutions of high order, and were not only educnting their own youth but oure sleo, nt ours dosired an edycation superior to what could be obtained in our common achools, and boving so high schools of our own, thoy wont to other collogos, and the consequence was, they were
drawn away from the faith of their fathera, which wo beliere to bo the faith of the Gospol. Hence various considorations combined to impress many of the brethren with the noces sity of seb

We bave nad that the cireumatancen by which tho oarly Christians wore aurrounded, and which led them to

Ono handred and eoventy-five yeara ago an assembly of peoplo from all denomiantions resolved to net up and

My entiject this mourzing wall be the momatry of angels. Thas sulject, it to us all but ufter wo eonsidiva bute we know tbout this part of Gol'n cre alion, or rather how litelo wo bsere

to get an expression from each one prowent in regard to angels, and get your true opicion, what do gou sup. pose it would be? I to not suppose same opinion and eome to the mame eonclasion respecing then class of being" The reason of this is, becuuse we bave beet radiog upon this subject to loonoiy. It is because we bave though about them ina very indefinte manner.
1 do not know why t is sa. When we look at the position in whiel God hes placed them, they arocertainly worthy of our conadoration and thougbt.
They are wortby of our attentwo pecially when wre rend that the time is coming when we shall becomeangels, or
hike angele. If I were 10 iell you the hke angels. If I were to tell you this norning that in some futare time yen
would become horace, you vould alt be surprised and be greatly interested to know all about borech, ther present condition as well as tberfutare. You would endasvor to learn all that coald be learned in regard to them. But
when I tell you tbat you are to become angels, or sy angols, you do not give the siljeet mucb attention. This is beesuso you have been thinking very loosoly about the subject; beenase your becauso very indchinite in rogard to it sbout this part of theology and roligioo. We have oar votions in regard to the fandamental prociples of religion and many of ua sgive in our concla

We will gotivo in the first place, what angels are, and who they are. Wben promise 10 do is very intolligeatly, from the thact that so bave no ground or busis upon which wo may form an in
telligent answer to this question If I were ealled upon to tril you ahout the wheh I conld firm my notions und ing roa-oungs They are rolated to os im steh a way an rhablen us to forma oor reet tenowledgen of them, hut when we
try to tulk about and tell wbo angele are, ubr muane of informatiou are very diarrent. All that wo can loavo abont them we mast icarn from the sacred wriungs. In the first part of the Bible Where angrels are tumken of, thoy ale Tposen of in such antudefimte masner
that it is very difficult for us to conie to very contert conclamone.
Sometimes God bunself is represent as an amgel, and agalo bo is represent angels. Bins when we come down to in lator periud it the hiatory of man, wo notico that diod epeakn of angela in diferent manower and as being diatinet and indepentiont from bimbeli. Wo uh!
readly agree that they are not huram. that they are of a dillerent order of ercution froun us Thas tact is clearly
sot fortb in tan They are reprosented is being bigher than man, or rither man ierepresented at butug a little lower that tho argele, bence we may infer that angels are little higher tion toan. Whon we ace cept them as being bigher than man We must accopt them as boing lower
thas God. They seem, thorefore, to take it ponition und relation be-

They are represented as appearing
Gomorrab. The angele of the Lord tald thom that Sara shoald bent ston d Abrahun's tent They not ouly did thua, but Abratisin conversed with thom. He invited them to bis hoespitality as etrangers, thinking ferbape that they wero men like bimself, and ordered water to wash there feet. Ho asked thetn to sit down while some-
thing was prepared for them to est. They remstned, stod when the ealf ws kalled and the moat prepared for them wo aro-told that they did eat. After thin, their messago was made known. Afar haviog completed thas minsion we nre told that thoy turned their fuces
towardg Soudom and we next find then in the doomed eily, conversitg with and entertained by Lot These marra tives and many other that we mught give elearly show that angole did uppeor anto men in all their personality, both as to their form and nature. 31 The office of Angels. We win
next notice the mission of ongels. The word, both in Hebrew and Greek, mean a messenger They wero God's men men-a meduata throngb which intetli gencen werv conveged from heaven to enrth. God conld have down all this withont the pid of angroln, but they wore his misisters io poriorm him will and in this thoy accomplisled pest of their misaion. Whle there mendayes were being dedreral hod himelt whe of tho three angels visting Abrahamas al roady relerred to. We are told that the remained with Abrabam after the avgeln had left, und it was then that o told bin of the distruction of Sodom By thas we see thint he could' have mude all this knofn himeolf, but ace cording to bis own great wisdom he thought it beat to do it through the ministry of angels There aro a large nember of instunces that we might produce to thow that God made nae of angels io bending has mosnages 10 man lat will only refer goe to those alreat; nomed, and that of Jacoln, Yacharinh Mury and Josuph. These glad tidings of great joy wore all proclamed through the minuetration of angels. It was their work na it was the worle of the mesiongers of Kings in anciont tituck, to emry messigrofrons one King
to another, or from a King to hia snb jects. Thowo men were called messon gers. So is it with the abgels Thoy are God's messungors for the phrpase of earrying lis messogen of joy whd prace to 11
boubl retmenher atesponation, bay not recelve moseat athougb W under the old, yet wo have abundunt uvidences in the New Testament Scrup turcs that rory precions trounages aro till Gransintsed to ub throagh the mum istration of angels. Thoy aro repre. coted as mimastess to God's peoplo theught should cernaibly attord us great deal of consolation, to know that o every child of God there is a ladder reachiog to heaven upon which angele aro descending and aweeding, and thas adminintering to ohy npiritval wata It affords the Chriztiat enjog roent,-it assure and strengthens hum; while on the ofbur hand, it is the terror of the Hast thing that they see and hed, for least thing that they see and hear for
which they cad not give any intelligent caase, will alorta them When their feare aro rased in tbes way, they
come to the conchnion that the effect ie produced by angels. This may not and so largely na in other conotrica There, many of the people attuibate all thene thiogs to the thinixtry of angles. If wieked they were made to fear, if right to rejoiec. They knew that if these Were God'e messongers, the inforroa tion conveged would bo good, if they rere righteons, and enil if they were vicked. This was the caeo with the wieked Bulahazar, who had beow haing the reeseln from the temple. Whea be aw tho bundwriting upoo the wall, be know that it was the writing of God or his angels, and his kaets sturek one
against the other. If thit King bad boet righteons, ho wituld not bave heet larmed; but as be was bicked, he rembled. So it is with all wieked men. When they see such a mamfortation of Ged's power they aro terrified.
God's power they aro terrified.
Lastly, we nonce that angele are to perform a very important work in the consummation of time. When God ball set his one foot upes the fea and the other upon the land, find declare thint time was, and time is, lint that time sball bo longer. Then it is wo are told that God will und bis ungles to gather this elect from the foar whida rom the uttermost part of the cartio to the uttermast part of beavon Nomater where they have been, whether in Africa, Asja, South Anelien, or the United Statos, they will be found by the ingola and trought to God. From all this wo learn that sugele are very important factory in the ceobomy of grice, athough wo moy bet bave conAdored thens is this light. It certainly hould afford ua a groat dca! of conto ation to know thut God bis given the ach diware ald-1 bo miniatry of angols -to anglat us in onr pilgrimago of lifo, cotransmit to us mesanges of divine love and p ace, to minieter to cur rants in times of a Aliction and distroes, ond to suntait us in alf of our sorrowh. It should be our greatest joy to know hut tho ange's is heaven not only sod gebut they minititer to our wants They are affurdigg na belp in our trials. Theg are leading as in patbs of peaco, and when wo sometimes, like Halsam, go out on mistions of dostruetion, they Fill tacet as is the way and raimo the sword of warbiug. They will btoys ba a our way waril earvor and gontly woo wa houck to tbe puths of peave und safety. Let as then think of this suljuct.
Lat us conader it in all its beavings, and though we can not learn exnetly shat angels are, where they reside, and from where they come, we can learn very wuch that will give we tood for thonght. 'There thorgbts will afford us mach consolation whilo prasing throngh hife. Though wo can not see them, they way he around me ns tho Lord'e army was aroned bis prophets. It our eyer conld to opered hke those of Elijab's sercant, wo migbt nee the angels of God hovering around ns-wa might beboll them ministering to our wants. As wo bumbly kneel belore God in prayor, wo might see the augels ascending and deseevding between heaven and rarth as Jacob saw them tyon $h^{\text {² }}$ h Indider, Betanbe wo do not see them with our natural eyes, is no reason to bolicve that they are not aiding lu as they did Giod's people of old. Wo live by fach. Our Cbristianity cabsinte in fath to (iod. If we be good and noble, the ministry of ungels will ffiord coneolation and jay tas it did Gidd's people of old.
